

# DYLAN GONZÁLEZ

## Software Developer

El Cangrejo, Panama City, Panama • +507 6738-3079 • yaiir.dev@gmail.com • yaiirdev.vercel.app

### PROFILE

Software developer with experience delivering technically complex projects for demanding enterprise clients. Passionate about building technology solutions with social impact, with a strong focus on user experience, ownership of project delivery, and the ability to quickly adapt to new technologies and development environments.

### WORK EXPERIENCE

**3Tech Panamá — Software Engineer** Nov. 2025 – Present  
Panama

- Designed and developed robust, scalable software solutions for demanding enterprise clients, managing multiple projects simultaneously with diverse functional and integration requirements.
- Actively contributed to requirements definition through direct client interaction, translating business needs into clear, actionable technical specifications.
- Implemented integrations with cloud services (file storage, secure API key generation, secrets management) and relational databases, with a focus on scalability and security.
- Collaborated within multidisciplinary teams, promoting effective communication and agile project management through Jira (Kanban boards, epics, timelines), ensuring deliverables aligned with business needs.
- Applied AI-assisted, specification-driven development methodologies (SDD) to accelerate the delivery of robust, maintainable solutions.

**Retina – CEMICIT AIP — Software Developer (part-time)** Oct. 2024 – Feb. 2025  
Coclé, Panama

- Built a monolithic web dashboard with integrated frontend, backend, and MySQL database, enabling centralized management of users, roles, and locations for UTP (Coclé Regional Center).
- Developed a connected mobile application (Android/iOS) with real-time location tracking, safe-zone configuration, and caregiver alert notifications.
- Designed the platform with a focus on accessibility and usability for people with disabilities.

**Retina – CEMICIT AIP — Software Developer (part-time)** Sep. 2023 – Feb. 2024  
Coclé, Panama

- Developed an Android application for medication management for elderly adults and people with cognitive disabilities, using NFC technology.
- Implemented automated SMS alerts to keep caregivers informed.
- Delivered the functional solution on time and in line with established requirements.

### TECHNICAL SKILLS

|                         |                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------|
| Frontend                | HTML, CSS, JavaScript, TypeScript, React, Next.js                                       |
| Backend                 | Node.js, Express, REST APIs, SQL, Python                                                |
| Mobile                  | Java, React Native                                                                      |
| DevOps / Infrastructure | Docker                                                                                  |
| AI-Assisted Development | OpenSpec, Claude Code, Codex                                                            |
| Methodologies           | Jira (Kanban, agile project management)                                                 |
| Tools                   | Git & GitHub, Postman, Figma                                                            |
| Soft Skills             | Teamwork, effective communication, problem-solving, fast adaptation to new technologies |

### CERTIFICATIONS

**Ethical Hacking** CertiProf

### LANGUAGES

**Spanish:** Native  
**English:** Basic (A2)

### EDUCATION

**Universidad Tecnológica de Panamá** 2021 – 2025  
*B.S. in Software Development — Panama*

**Colegio Rodolfo Chiari** 2014 – 2020  
*High School Diploma, Technology — Panama*
